

CI Click

Move with greater speed by clicking less.

A customizable, single-click, multi-select coding tool simplifies repetitive coding by streamlining clicks, for faster review and reduced costs.

The screenshot shows a web application interface for coding. At the top, there's a navigation bar with buttons: "Coding Layout", "Save & Next", "Save", "Cancel", and a dropdown menu with options like "Resp_Not Priv_Not Conf_Hot", "Not Resp_Not Priv", and "CI Click". Below the navigation bar, the main content area is divided into sections. The "Default Category" section includes fields for "Control Number", "Custodian", "Unified Title", and "STR - Key Terms". The "Coding" section contains several categories with checkboxes: "Responsiveness" (Responsive, Non-Responsive, Further Analysis Required, Technical Issue), "Privilege" (Attorney Work Product, Attorney-Client Communication, Potentially Privileged, Not Privileged), "Hot" (Hot), and "Confidentiality" (Not Confidential, Confidential, Highly Confidential). Each category has a "Manage" link below it.

FEWER CLICKS

Reviewers are able to, with one click, code multiple fields. Less time clicking each choice and less time scrolling through the layout resulting in time efficiency and cost savings.

FULL ADMIN CUSTOMIZATION

CI Click allows for full customization, from what choices are included in the action to auto-advancing the reviewer to the next document. Coding layout buttons can also be added to further customize the user experience based on review needs.

The best technologies, made better.

Cimplifi Innovations combine proprietary tools, automated workflows, AI, and integrated technologies to simplify administration, improve visibility, and streamline legal operations across users, matters, and platforms.

STREAMLINED ADMINISTRATION

Centralize workflows, users, and processes through integrated tools and automated administration.

INTEGRATED INSIGHTS

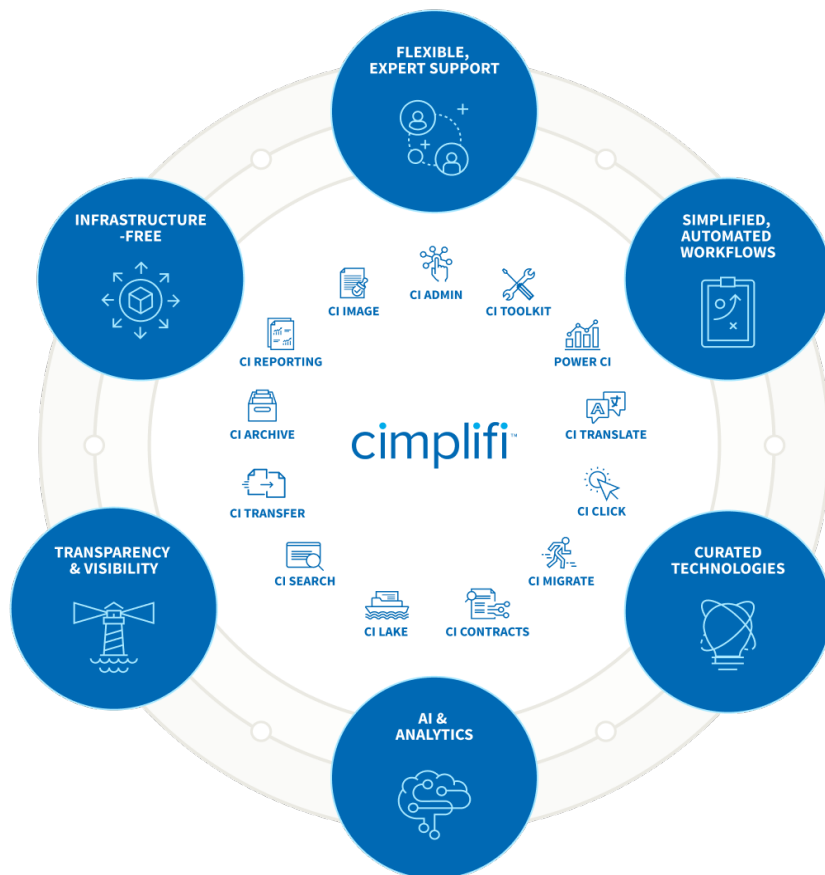

Unified dashboards, reporting, and analytics provide greater visibility across matters, contracts, and operations.

AI-ENABLED WORKFLOWS

AI and automation help reduce manual effort, improve consistency, and accelerate outcomes.

FLEXIBLE & SCALABLE

Deploy innovations independently or together as part of a connected operational experience.

Greater visibility. Less complexity. Better workflows.
