Contract Analytics & Lifecycle Management (CALM™)

Advisory services, AI-powered insights, and technology solutions for modern contract operations.

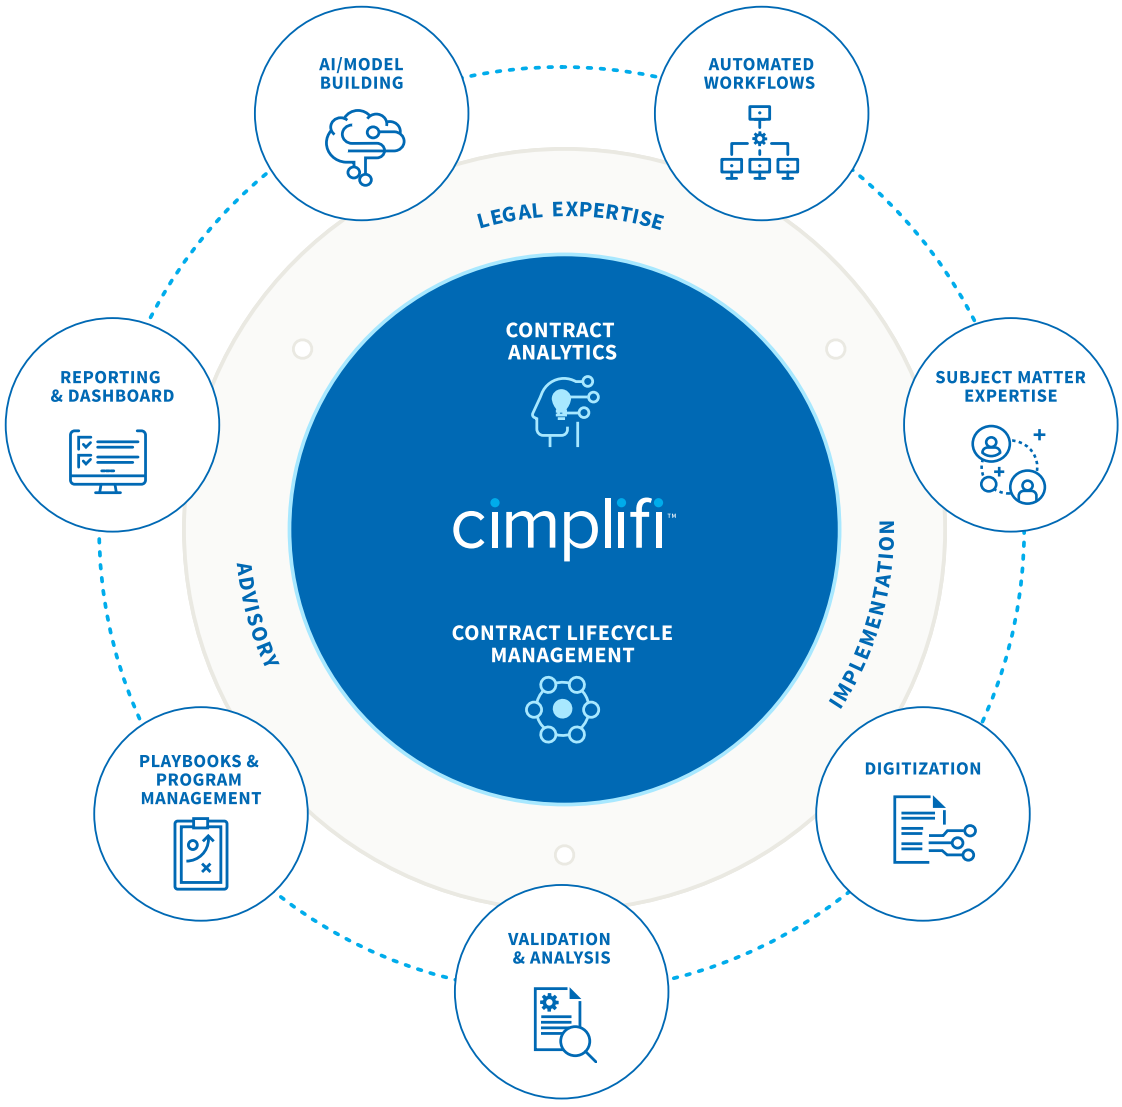
cimplifi™

Contract Analytics & Lifecycle Management (CALM)

Technology alone doesn't deliver value from contracts.

Cimplifi combines advisory services, AI orchestration, proven methodologies, and leading contract technologies to help organizations turn contract data into actionable intelligence they can trust.

Whether you're evaluating a new platform, optimizing existing processes, or developing a long-term contract operations strategy, we help orchestrate the right people, processes, data, and technology to create scalable programs that improve visibility, efficiency, governance, and business outcomes.



Built for Modern Contract Operations

Contracts touch every part of the business. Cimplifi helps organizations align people, processes, technology, and data to create more connected, effective contract operations.

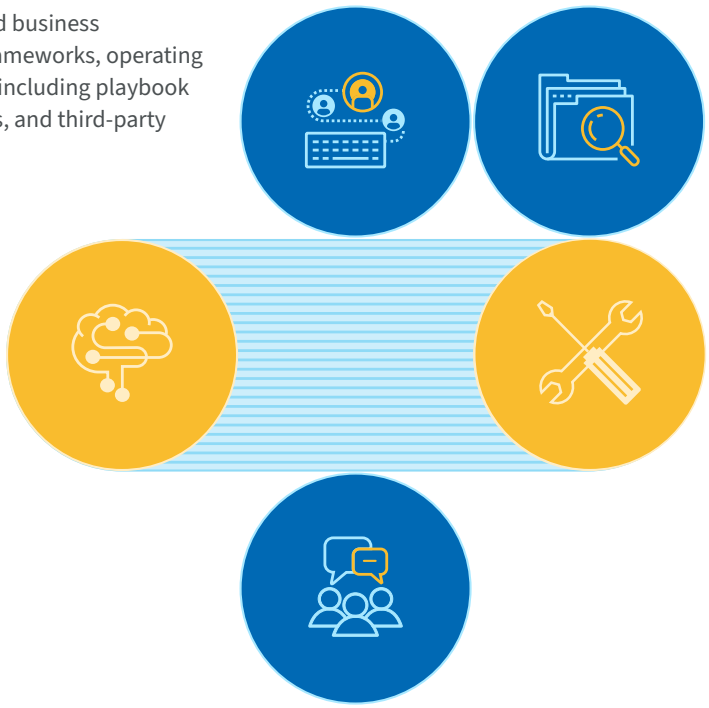
How We Help

CONTRACT OPERATIONS ADVISORY

Partner with legal, procurement, and business stakeholders to build governance frameworks, operating models, and long-term strategies — including playbook development, negotiation standards, and third-party paper management.

AI MODEL BUILDING & ENGINEERING

Design and train custom AI models that identify clauses, obligations, and key contract data with precision — built iteratively with legal and subject matter expertise for accurate, scalable results.



TECHNOLOGY SELECTION & IMPLEMENTATION

Evaluate, select, implement, and optimize CLM technology aligned to your business goals. Cimplifi has deep implementation expertise across leading platforms.

PROCESS DESIGN & AUTOMATION

Standardize processes, automate manual tasks, and build repeatable procedures that reduce friction and improve consistency across the contract lifecycle.

ADOPTION & CHANGE MANAGEMENT

Drive sustainable adoption through training, enablement, and ongoing support that helps teams build new ways of working.

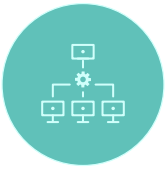
Our Solutions

Our core capabilities work together — or stand on their own — to support every stage of the contract lifecycle, from discovery and analysis through implementation and ongoing management.

Contract Discovery

Collections & Forensics Expertise

Our forensic examiners are skilled in data extraction, ingestion, migration, and normalization, delivering precise, organized reports that drive better decisions.



Expansive Approach

We apply 20+ years of proprietary workflows developed for eDiscovery and advanced analytics for an expansive approach to contract collection and identification.

Broad Reach, Deep Insight

Using industry-leading tools, we collect data from across your enterprise — regardless of location, source, or type — and deliver insight into its content in minutes.

CONTRACT MAPPING
We identify legacy and emerging data sources and their locations, providing critical insight into your contract ecosystem.

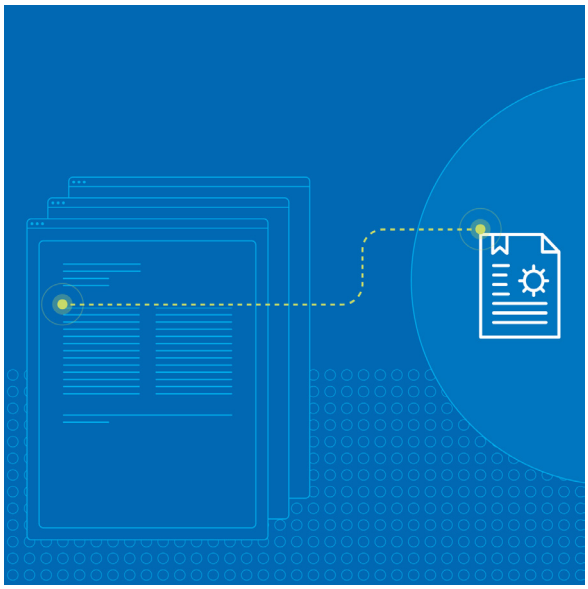
CONTRACT COLLECTIONS
On-site or remote collection from structured and unstructured sources, including Ariba, Apptus, Slack, MS 365, WhatsApp, MS Teams, hard drives, and mobile devices.

VALIDATION & ANALYSIS
Our analysts bridge the AI gap to deliver cost-effective, timely, high-quality contract analysis.

TECHNOLOGY
Access an expansive ecosystem of industry-leading software, including Docusign, Ironclad, X1, F Response, Aid4Mail, and Cellebrite.

Contract AI & Analytics

Our experts know how to build AI models that deliver unparalleled efficiency, confident visibility, and actionable insight.



We apply custom analytics and workflows to extract, analyze, and normalize data from large volumes of complex documents — far more efficiently than manual review, surfacing issues and reducing risk and exposure.

Our AI-powered models find nuanced, specific language buried in complex contracts, improving the accuracy of every extraction.

THIRD-PARTY PAPER EXTRACTION

Building AI models to extract critical information from third-party paper.

CONTRACT FAMILY MAPPING

Mapping legal documents into contract families.

TABULAR DATA EXTRACTION

Extracting information from tables and grids.

CREATING A CENTER OF EXCELLENCE

Building an industrial-strength Center of Excellence (COE) in-house.

CI Contracts

Contract analytics and eDiscovery converge in CI Contracts — the industry's first end-to-end contract analytics and review platform, powered by the most advanced AI available today.

Built on RelativityOne and integrated with leading contract analysis tools, CI Contracts searches, de-duplicates, analyzes, and mines large contract portfolios for key data — delivering a custom analysis report, a RelativityOne workspace for attorney review, or both. It's purpose-built for high-stakes use cases like M&A due diligence and regulatory response, dramatically reducing the time, resources, and cost of large-scale contract review.

Why CI Contracts

EFFICIENCY & COST SAVINGS

AI-driven review reduces the need for large human reviewer teams, saving time, cost, and resources.

INTEGRATED, INTUITIVE ANALYSIS

Built directly into Relativity, CI Contracts replaces complex regular expressions with intuitive natural language queries — no technical expertise required.

SMARTER DOCUMENT RELATIONSHIPS

Automatically identifies parent agreements and amendments and rolls up contract versions into a single master document — work that once required manual review.

Key Use Cases

REGULATORY

Responding to regulatory requests arising from crises such as bank failures.

CYBERSECURITY

Data protection and breach preparation and response.

MERGERS & ACQUISITIONS

Due diligence, post-merger integration, and divestitures.

DATA MIGRATION

Data preparation and extraction for CLM.

Contract Lifecycle Management

Our advisory services help you build workflows, establish repeatable best practices, and select the right technologies for a scalable solution that delivers efficiency, control, and ROI.

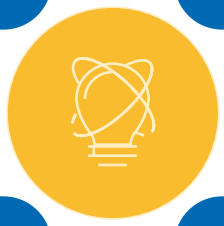
Our next-gen CLM solutions weight risk at the clause level, create data-driven intuitive contracts, and build negotiating profiles — empowering your organization to standardize, automate, and even eliminate manual intervention in contract management.

Facilitating Adoption

Methodologies and training approaches that support new ways of working.

Third Party Paper

Automated workflows that facilitate third-party negotiations.



AI-Driven Workflows

Contract analytics drive automated CLM workflows.

Repapering

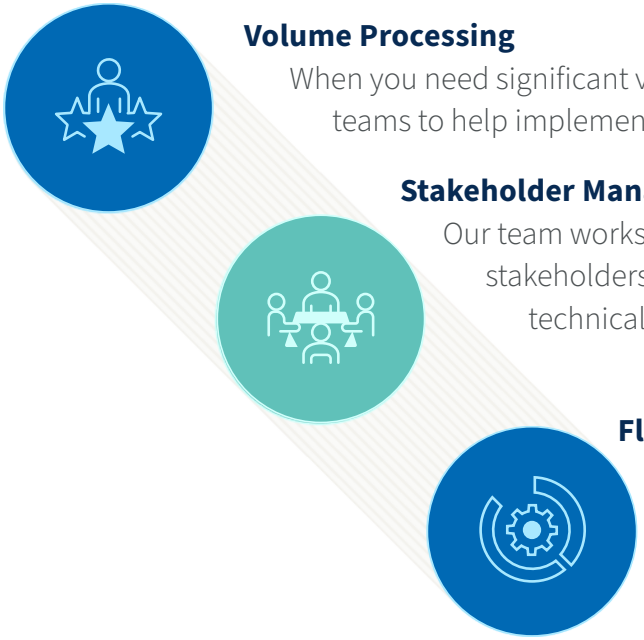
Tailored solutions that automate repapering and notification.

AI-Powered Managed Services

As experts with in-house experience across legal and financial services, we help you run contract analytics and lifecycle management projects effectively and efficiently.

We use contract analytics, AI, and other emerging technologies to dramatically reduce the people required for a project, maximizing the value of your technology investment.

We act as a trusted advisor across the contract lifecycle — implementing software, building a Center of Excellence, and running the day-to-day operations of your CLM through streamlined workflows that maximize every aspect of AI.



Volume Processing

When you need significant volumes of contract review, we provide certified, trained teams to help implement or run your CLM.

Stakeholder Management

Our team works hand in hand with legal operations and line-of-business stakeholders, championing AI CLM best practices and bringing in technical expertise to support or augment existing staff.

Flexible Contracting Capacity

Our AI-powered models find nuanced, specific language buried in complex contracts, improving the accuracy of every extraction.

From Contract Complexity to Contract Confidence

Successful contract programs require more than implementation — they require the right combination of strategy, governance, technology, and operational support.

Cimplifi works alongside legal, procurement, compliance, and business teams to help organizations build scalable contract operations that support growth, reduce risk, and improve performance. Our attorney-led, technology-enabled approach bridges the gap between strategy and execution.

Common Engagements

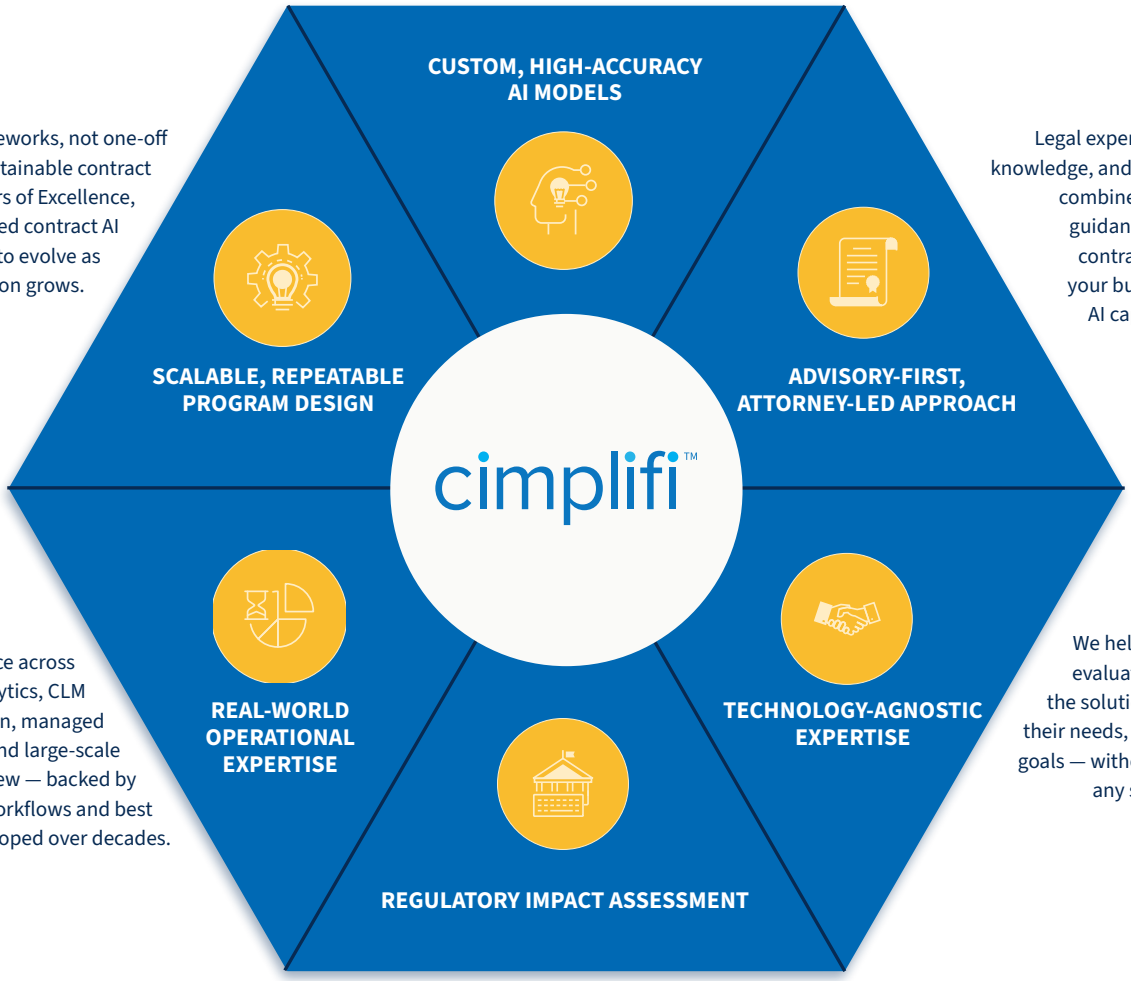
- Contract Operations Transformation & Assessments
- CLM Strategy & Roadmap Development
- CLM Implementation, Optimization & Data Preparation
- Governance & Playbook Development
- AI Readiness & Adoption
- Contract Data & Portfolio Modernization
- Center of Excellence Development
- Workflow, Process & Business Automation
- Third-Party Paper & Repapering Programs
- M&A, Divestitures & Regulatory Response
- Procurement & Vendor Management
- Commercial Terms, Risk & Compliance

Why Legal & Contract Teams Choose Cimplifi

Models trained to identify nuanced clauses and extract high-value insights from complex or non-standard contract language, at scale.

We build frameworks, not one-off projects — sustainable contract operations, Centers of Excellence, and automated contract AI programs designed to evolve as your organization grows.

Legal expertise, subject matter knowledge, and technology fluency combine to deliver practical guidance grounded in how contracts actually work in your business — backed by AI capabilities that make results faster, more accurate, and more defensible.



Deep experience across contract analytics, CLM implementation, managed services, and large-scale contract review — backed by established workflows and best practices developed over decades.

We help organizations evaluate and optimize the solutions that best fit their needs, workflows, and goals — without bias toward any single platform.

We help clients adapt to new regulatory requirements, offering contract analytics solutions tailored to outcomes like preparedness and compliance.

Ready to modernize your contract operations and unlock the value hidden in your contracts?
