

# Time For Your CLM Health Check

With over six decades of experience analyzing data and automating workflows, Cimplifi leads the way with technology-driven contract analytics and lifecycle management (CALM™) solutions to get the most out of your technology investment.

## DRIVE RESULTS

Our advisory services help you build workflows, establish repeatable processes and best practices, and leverage the right technologies to create a scalable solution that delivers efficiency, control, and ROI.

## IMPROVE CONTRACT MANAGEMENT

We empower your organization to limit or even eliminate manual intervention by implementing a tailored, technology-enabled CLM solution that delivers standardization, governance, and automation for better contract management.

## OUR CONTRACT LIFECYCLE MANAGEMENT HEALTH CHECK SOLUTION

### Current Challenges

Assess state of the current workflow to identify critical blockers needing immediate attention, templates, scalability, and is the client getting the best value from the workflow.

### Cost Savings

Evaluate current usage of licenses. Answer questions like 'Are they being used, or need to add more to bring efficiencies to the solution?'

### Migration

Identify current or legacy documents that need to be migrated into the CLM in order for the central repository to be most valuable.

### Benchmark & Measure

Establish reference points throughout health check to best compare and measure throughput, adoption, enablement level, and workflow efficiency.

### Future Challenges

Identify potential issues on the horizon and additional needs as the system scales.

### Security Infrastructure

Assess the effectiveness of the current folder structure and establish or organize a central contract repository.

### Integrations & Users

Assess if integrations are effectively established and utilized to deliver users a seamless experience across interconnected systems
