

## Customized Invoicing with Cimplifi

Cimplifi can customize reporting to integrate with platforms like Aderant, enabling the creation of tailored billing solutions that fit the specific needs of law firms and corporate legal departments.

Through its proprietary CI tools and advanced reporting capabilities, Cimplifi allows legal professionals to automate the tracking and reporting of billable activities, ensuring that billing data aligns with firm-specific requirements.

This customization can involve generating detailed time-tracking reports, linking billing information to matter management within Aderant, and configuring invoices to reflect varying billing rates, task codes, or other billing structures. Through custom developed reports, Cimplifi can streamline the entire billing process, from time entry to final invoice generation, ensuring that the financial aspects of legal operations are managed efficiently and accurately.

With Cimplifi capabilities, users can generate custom reports that directly pull data from Cimplifi systems, organize it according to billing rules, and export it for use in Aderant, reducing manual data entry and the risk of errors. This tailored approach helps firms optimize their financial processes and improve the accuracy of their billing systems.
