

# Introducing unifi and unifi+

Discover the many advantages of Cimplifi and see why clients love working with us.

Unifi extends the Cimplifi ecosystem to clients that want their own direct relationship with the software provider but still need professional services to deliver top notch expertise and support to their stakeholders and clients. Manage your projects with as much or as little support and access as you need. Bring on expert support as volume and complexity increase or resources get stretched.

With the Unifi experience, get access to professional services, software, or both. We bring expertise, guidance, best practices, and we can also do the work for you when you need support.

## UNIFI

With Unifi, you have access to our team of experts, project managers, and consultants that can act as an extension of your team providing seamless support, working collaboratively with you to solve your most complex challenges. Unifi is how we unite your access to software applications and tools through a software provider with your need for a service provider to complement your internal team.

With the Unifi program, you have more control, choice, and ease and multiple ways you can engage our team. Unifi offers our clients full end-to-end project management services including:

- Provide ongoing training and support to build out your program
- Drive and develop processes including updating playbooks
- Advise on leveraging ECA workflows
- Leverage automated processing workflows
- Handle workspace administration activities
- Manage storage tiers
- Provide off-hours/ weekend/ overflow support

## UNIFI +

Unifi+ provides access to both Cimplifi professional services (everything in our Unifi program) and to our client-centric experience and ecosystem that empowers you with the software, tools, and expertise needed to meet evolving and complex legal and regulatory obligations.

With Unifi+, you will get access to our comprehensive portfolio of technology-enabled solutions that integrate proprietary tools and automated workflows with powerful eDiscovery and contract analytics tools to deliver greater visibility and control in an easy-to-use, end-to-end system.

Unifi+ includes access to our suite of Cimplifi Innovations (CI), proprietary tools and automated workflows that streamline processes, unify reporting, and empower users. CI tools are designed to deliver a seamless, user-friendly experience that pulls everything together across your teams, tools, and matters for greater visibility and control, with less complexity and effort.

Developed with client input and designed to solve your workflow challenges, our CI tools deliver a seamless, user-friendly experience, valuable insights and benefits, all with less complexity and effort. Explore our suite of CI Tools:

### POWERCI

Real-time metrics and insights through our unified dashboard.

### CI ADMIN

With SSO log-in, streamline administration with expansive tool permissions, and cross-tool user management.

### CI CLICK

A single click, multi-select coding button in Relativity.

### CI MIGRATE

Move your data from any review tool into RelativityOne with ease.

### CI IMAGE

Manipulate images, customize watermarks and exhibit stamps within Relativity.

### CI CONTRACTS

Leverage advanced AI technologies to expedite large-scale contract review.

### CI REPORTING

With just a few clicks, you can run multiple saved searches, reports, and scripts, amalgamating all the information into a single, comprehensive report.

### CI TRANSLATE

Translate your documents on the fly in more than 50 languages using Azure Cognitive Services Translator.

### CI TOOLKIT

A full suite of data management tools that easily manage your data prior to upload and processing.

### CI SUPPORT

Access support articles and communicate with our helpdesk, project managers, and techs.

### CI ARCHIVE

With just a few clicks, you can ARM Relativity workspaces for ultimate flexibility and efficiency in storage.

### CI SEARCH

An advanced automated search term normalization platform that reduces the manual process of reviewing and validating search terms.
